## Introduction to Autism

For Parents and Caregivers of Children  
Presented by Autism Connection of PA Staff

Getting any new diagnosis comes with the need to understand it. Learn the basics about autism, and get some take-home tips from people who understand and have worked in this field for 20+ years.

We will explain the details about autism and how brain differences help shape personality, likes, dislikes, fears, eating, sleeping, the senses, and communication. Please come and ask your questions, meet others with similar concerns, and learn what to do at home and in the community!

This is a free workshop, but pre-registration is required.
